Subject: Please settle this case....

It is fair and we all need to move forward. AOL and SUNW may not agree but they are the only ones complaining. The states just want money out of MSFT. They should learn to run state budgets better and stop trying to shake down companies.

The US Government spend more money on MSFT then it did Bin Laden. Now they are going to protect us against MSFT? That money should be used to protect US Citizen and not trying to put companies out of business.
